Skills

C# programming	● ● ● ● ●
Unity gameplay mechanics	● ● ● ● ●
Physics and collisions in Unity	● ● ● ● ●
UI design and menu systems	● ● ● ● ●
Animation implementation in Unity	● ● ● ● ●
Working with 3D assets, materials, and visual effects	● ● ● ● ●
AI Tools Proficiency (ChatGPT, Midjourney)	● ● ● ● ●
Sourcetree	● ● ● ● ●
Git version control	● ● ● ● ●

Profile

I am a Unity developer with solid experience in C# programming and 3D game development. I worked on creating a zombie-themed Tower Defense game, where I implemented complex mechanics such as various enemy and tower types, an efficient projectile management system, and game performance optimization. I developed advanced features for tower upgrades and selling, ensuring an interactive and intuitive user experience. I am detail-oriented, and my knowledge of physics, AI, and animations in Unity allows me to create high-quality, optimized, and engaging games.

Education

Unity Game Development

Oct 2023 - Dec 2024

STEP IT Academy Moldova, Chisinau

- Proficient in creating and optimizing gameplay mechanics using C# scripting within the Unity environment.
- Developed an understanding of 3D modeling and animation principles to integrate assets effectively within Unity.
- Experienced in designing user interfaces using Unity's UI toolkit to enhance player engagement.
- Gained hands-on experience with physics simulations and particle systems to create immersive game experiences.
- Familiar with version control systems such as Git to collaborate efficiently on game development projects.

Business and Administration

Sep 2021 - Jun 2024

State University of Moldova, Chisinau

Portfolio

Languages

English	● ● ● ● ●
Romanian	● ● ● ● ●
Russian	● ● ● ● ●

Hobbies

- Playing video games
- Create indie games
- Analyzing storylines in detail
- Psychology and human behavior analysis

Qualities

- Creativity
- Adaptability
- Problem-solving
- Critical thinking
- Attention to detail
- Collaboration
